Ministry of Education
SINGAPORE

Date: 09 APR 2026

REFERENCE NO.: MOE/26/AST/04-01

Dear Supplier,

1. The Ministry of Education (MOE), for and on behalf of the Government of the Republic of Singapore, is pleased to invite you to participate in a Pre-Tender Qualification for the above Selective Tender.

OBJECTIVE

2. MOE is procuring a production-ready, commercial Software-as-a-Service (SaaS) learning platform to support educators' continuous professional learning. The platform is intended to operate at scale across schools and HQ divisions, supporting diverse learning needs and contexts. It should support diverse learning modes, including independent learning, collaborative learning, and workplace-based learning.

3. The platform should demonstrate strong out-of-the-box capabilities aligned to user needs, with configuration preferred over customisation. This reflects MOE's intent, in this context, to leverage mature, purpose-built SaaS solutions that benefit from continuous innovation and scalable architectures — allowing ongoing improvements without the cost and complexity of bespoke system development.

4. The platform should be Artificial Intelligence (AI)-ready, reflecting the importance of personalisation and knowledge discovery in professional learning. Suppliers should demonstrate how artificial intelligence is meaningfully embedded within core product features and user workflows to enhance educators' learning outcomes.

5. Solutions should have demonstrated deployment in comparable environments and be deployable with minimal implementation overhead to enable early realisation of value.

6. This will be a contract for 3 years, with extension options for up to a further 3 years, subject to terms to be agreed. Extension periods and terms will be determined based on performance, budget availability, and operational requirements.

7. This is the pre-tender qualification stage of a two-stage Selective Tender. Up to 4 suppliers who meet the qualification criteria and score highest will be invited to participate in the subsequent tender stage.

CONTEXT

8. Professional learning for educators is increasingly shifting towards flexible, personalised, and practice-embedded models. Teachers today engage in learning through a combination of approaches:

(a) **Self-directed and collaborative learning:** Teachers pursue independent learning whilst engaging in collaborative inquiry with peers and participating in professional learning communities.

(b) **Practice-based reflection:** Educators reflect on their classroom practice to inform their professional learning.

(c) **Resource access and formal learning:** Teachers access curated knowledge artefacts, sign up for courses, and track their completion.

9. MOE is exploring the adoption of a professional learning platform that will enable educators to discover relevant learning resources, participate in collaborative learning activities, and receive contextualised support for their learning and its practical application.

10. MOE is particularly interested in platforms capable of operating in large-scale organisational knowledge environments (estimated up to 45,000 users), where learning artefacts and resources may be distributed across multiple repositories. The platform must support secure retrieval, discovery, and synthesis of knowledge while respecting repository-level access controls and user permissions. The platform is intended to support educators across schools and HQ divisions, with the potential for phased rollout across the education system.

PLATFORM OUTCOMES

11. Educators using the platform should be able to achieve the following outcomes:

(a) **Learning content discovery and administration:** Discover relevant professional learning resources efficiently through intelligent search and synthesised recommendations, and engage in independent professional learning through curated microlearning modules and learning pathways.

(b) **Collaboration and Community:** Collaborate with peers and communities of practice through discussion, artefact sharing, feedback, and reflection.

(c) **AI-Enhanced Support:** Receive AI-enhanced support in discovering relevant research, practices, and resources tailored to their needs, as well as personalised learning recommendations and support for creation of learning materials.

(d) **Knowledge Management at Scale:** Support synthesis, retrieval, and organisation of a growing knowledge base of professional artefacts — including documents, videos, images, and collaborative outputs — while remaining performant at scale.

Additional outcomes may also be considered to enhance the effectiveness, adoption, and long-term sustainability of the platform.

TERMS AND CONDITIONS

12. Suppliers are to note that the requirements in this qualification stage are not final. The issuance of this Notice by MOE and the submission of responses by suppliers do not create a legally binding relationship between MOE and any supplier.

13. Suppliers who wish to respond to this qualification stage are bound by the terms and conditions of this Notice. MOE reserves the right to reject any supplier who fails to comply with these terms and conditions. Failure to meet mandatory requirements stated in Paragraph 16 will be grounds for disqualification.

14. MOE reserves the right at any time to amend or add to any of the requirements, terms, and conditions contained in this Notice via a corrigendum before the closing date.

SHORTLISTING OF SUPPLIERS

15. MOE shall shortlist suppliers for the subsequent tender based on their responses to Annex B (Supplier Questionnaire), compliance with the mandatory requirements in both Paragraph 16 and Annex A, and evaluation criteria in Annex A. For avoidance of doubt, mandatory requirements are requirements specified with the words 'shall', 'must' and/or 'mandatory'.

16. All proposed solutions must meet the following mandatory requirements and additional mandatory requirements as specified in Annex A and Annex B:

(a) **Enhancing learning outcomes with AI:** The platform must demonstrate how AI fundamentally enhances the learning experience in areas including but not limited to adaptive delivery based on learner's preferences and content co-authoring.

Other AI-enabled workflow enhancements such as Model Context Protocol (MCP) support to enable interoperability between the learning system and other MOE applications, while not mandatory, will also be considered favorably.

(b) **Semantic Knowledge Discovery:** The platform must support accurate hybrid search (semantic and keyword) and retrieval across multiple knowledge sources, enabling users to discover relevant learning content through meaning rather than exclusively keyword matching.

(c) **Dynamic Learning Pathway Generation:** The solution must support personalised learning pathways to courses and knowledge sources based on user needs and context, rather than relying solely on static pre-defined course structures.

17. MOE is particularly interested in mobile-friendly solutions that support semantic knowledge discovery, synthesis across multiple knowledge sources, and dynamic learning pathways, rather than platforms that primarily deliver static course content.

18. Suppliers shall provide evidence of their track record, including but not limited to: financial standing, concurrent user base, and customer satisfaction benchmarks (e.g. Net Promoter Score, Customer Satisfaction Score (CSAT), or G2 ratings).

19. Suppliers shall not be debarred from participating in tenders issued by the Government of Singapore.

20. A maximum of four (4) suppliers who meet all the pre-qualifying criteria stated in Paragraph 16 and score highest against the evaluation criteria in Annex A shall be eligible to participate in the subsequent tender stage.

SUBMISSION OF DOCUMENTS

21. Suppliers who wish to respond to this qualification stage shall submit their responses addressing all questions in **Annex B (Supplier Questionnaire)**, demonstrating their ability to meet the qualification criteria stated in Paragraph 16. All responses shall be submitted electronically via GeBIZ. Late submissions will not be accepted.

22. No oral representation shall be:

(a) binding on MOE; or

(b) construed as modifying or varying any of the provisions of this invitation.

23. This invitation may not contain all information which you may require. You should therefore make your own inquiries and seek such clarifications as you think necessary. MOE shall not be liable for any information in this invitation which is incomplete or inaccurate.

24. MOE shall be under no obligation to invite suppliers who have responded to this Notice for the subsequent tender, or to correspond with any supplier regarding the reasons for not being invited.

25. In the event that MOE needs to clarify any aspect of a response to this Notice, suppliers shall provide a comprehensive response within three (3) working days of notification, unless otherwise agreed by MOE. Clarification meetings may also be conducted, and suppliers shall bear all expenses in relation to such meetings.

26. Information from responses to this Notice may be shared publicly as part of the tender process. Suppliers must flag and highlight any sections of their response that should not be disclosed publicly.

EXPENSES INCURRED

27. Suppliers who respond to this Notice shall bear all expenses in the preparation and submission of information and documents to MOE.

LANGUAGE

28. The response to this Notice, and all information and documents submitted to MOE, shall be written in the English language.

CANCELLATION

29. MOE shall reserve the right to cancel this notice at any time without prior notice and without being liable for any costs, damages, losses and/or expenses whatsoever incurred by any party.

APPLICABLE LAWS

30. This Notice and all its subsequent variations (if any) shall be subject to, governed by, and interpreted in accordance with the laws of the Republic of Singapore.

FOR CLARIFICATION

31. Any clarification needed by suppliers shall be submitted via email to **Judy Lee** (judy_lee@moe.gov.sg) and **Lee Kah How** (lee_kah_how@moe.gov.sg) at least **five (5) working days** before the closing date of this Notice.

ANNEX A — EVALUATION CRITERIA

QUALIFICATION PROCESS

Suppliers must first meet all mandatory requirements listed at the start of Annex B (specified as “Mandatory Requirements”), as well as security and company profile requirements specified below, to qualify for evaluation. These are threshold requirements - suppliers either meet them or are disqualified.

EVALUATION OF QUALIFIED SUPPLIERS

Qualified suppliers who meet the mandatory requirements are then evaluated against three weighted categories (see table “Evaluation Weightage for Stage I”). Each Annex B question contributes to the category it maps to.

Evaluation Weightage for Stage I

SN	Category	Weight	Annex B Questions/ Reference
1	Enhancing learning outcomes with AI	30%	Q1 (AI enabled personalisation) Q2 (AI maturity) Q3 (dynamic pathways) Q4 (access management) Q5 (AI Search, content creation) Q6 (MCP)
2	Course Administration and Management	30%	Q7 (framework alignment) Q8 (course admin) Q9 (modalities) Q10 (collaboration) Q11 (repository) Q12 (dynamic assembly)
3	User Experience & Change Management	40%	Q13 (learning impact) Q14 (implementation) Q15 (UX/interface) Q16 (change management) Q17 (production readiness)

Questions not listed above are for information (e.g. Company Profile) and do not carry weighted scores.

Mandatory Company Profile (Pass / Fail)

Criterion	Ref
Free from debarment	Para 19
Registration with GRA at financial grade S7, OR Net Tangible Asset of at least \$250K (with paid-up capital of at least \$250K) AND turnover/sales/revenue of more than \$0.5M based on last 3 years of certified or audited financial statements	Para 18

The latest financial statement should be within the last 12 months from the Qualification publication date.

ANNEX B

SUPPLIER QUESTIONNAIRE

Suppliers shall respond to all questions below.

Evaluation weightage is specified in Annex A.

Mandatory Requirements

Please respond to the following questions based on the current technical architecture (i.e. existing implemented solution) instead of a future roadmap.

Suppliers must respond “Yes” to each mandatory requirement to be considered compliant.

Any supplier that fails to meet any mandatory requirement will be disqualified and will not proceed to further evaluation.

A. Does your platform automatically adjust a learner's content or learning pathway based on the user's new input, past activity and/ or performance data, without manual input from an administrator?

- Yes
- No

B. Are there AI features already implemented in your learning platform?

- Yes
- No

C. Does your platform use role-based access control (RBAC) that enables admins to manage user access rights based on defined roles and responsibilities, without requiring Service Provider intervention?

- Yes
- No

D. Can your platform integrate with Microsoft SharePoint and Google Drive?

- Yes
- No

Section 1: Enhancing Learning Outcomes with AI

Evaluated under Category 1 · Weight: 30% — see Annex A, Evaluation Weightage for Stage I

1.1 AI-Ready Platform Architecture

Q1. Does your platform automatically adjust a learner's content or learning pathway based on the user's new input, past activity and/ or performance data, without manual input from an administrator?

- Yes – uses all user's input, past activity and performance data
- No – uses some but not all of the above (please specify)
- No

Comments: Describe how learning personalization is done on your platform.

Q2. How would you describe the maturity of your AI architecture?

- Fully AI-native — AI is foundational to all system components (knowledge stores, indexing pipelines, orchestration layers)
- Mostly AI-native — AI is central to most components, with some legacy elements
- Partially AI-enabled — AI is integrated into select features but not the core architecture
- AI is on the roadmap but not yet implemented

Comments: Describe your system components, knowledge stores, indexing pipelines, and orchestration layers.

1.2 Dynamic Learning Pathways

Q3. How would you describe your platform's learning pathway capability?

- Fully dynamic — learning materials are assembled in real time based on individual user needs across multiple sources
- Semi-dynamic — pathways are personalised within predefined structures
- Static — course structures are fixed and not dynamically assembled
- On roadmap

Comments: Describe how your system assembles personalised learning journeys and supports learner self-tracking.

1.3 Access Management and Licensing

Q4. How does your platform manage user access, licensing, and authentication when integrating with third-party content providers?

- Fully managed — SSO, licensing, and access controls are handled natively within the platform
- Partially managed — some elements require manual configuration or external tools
- Not yet supported

Comments: Provide any relevant supporting evidence/ examples where relevant, e.g. screenshots to demonstrate what such content integrations look like

1.4 AI-Powered Search and Content Generation

Q5. Has your platform demonstrated the capability to support at least 45,000 users while maintaining optimal performance standards, including seamless real-time AI-powered search and content generation functionality?

- Yes — proven in production
- Yes — demonstrated in testing/staging
- Not yet demonstrated at this scale

Comments: *Provide performance benchmarks or evidence if available.*

1.5 Model Context Protocol (MCP) Interoperability

Q6. Does your platform support hosting custom Model Context Protocol (MCP) servers to enable interoperability between your solution and other MOE products?

- Yes
- No

Comments: *Explain how MCP interoperability is implemented or planned.*

Section 2: Course Administration and Management

Evaluated under Category 2 · Weight: 30% — see Annex A, Evaluation Weightage for Stage I

2.1 Alignment with MOE Learning Frameworks

Q7. How does your platform support alignment with organisational professional learning frameworks and competency models?

- Natively supports mapping of content and pathways to custom competency frameworks
- Can be configured to align with organisational frameworks with moderate effort
- Does not currently support alignment with external frameworks
- On roadmap to complete by Jan 2027
- Others: please explain

Comments: *Describe how your platform enables organisations to map learning resources, pathways, and outcomes to their professional learning frameworks or competency standards.*

2.2 Course Creation and Management

Q8. Which course administration capabilities does your platform support? (Select all that apply)

- Content creation and authoring
- Course enrolment and management (e.g. attendance, registration, waitlisting)
- In-person event creation and management
- Programme creation (collections of related courses under a thematic programme) and management
- Pre-course and post-course activities (e.g. emails, pre-reads, post-reads)

- Post-course evaluation
- Other: ____

Comments: Describe your platform's approach to course lifecycle management.

2.3 Digital Learning Modalities

Q9. Which learning modalities does your platform support? (Select all that apply)

- Microlearning modules
- Video-based learning
- Live or synchronous sessions (e.g. webinars, virtual classrooms)
- Mobile-responsive or native mobile learning
- Blended learning (combining online and in-person)
- Other: ____

Comments: Describe how your platform supports multiple modalities and any mobile-specific capabilities.

2.4 Collaborative Knowledge Building

Q10. Which collaborative features does your platform support? (Select all that apply)

- Annotation
- Discussion threads
- Artefact remixing (referencing existing materials to create new ones)
- Peer feedback
- Community Spaces (ability for groups to configure access controls, add/remove members, and store artefacts)
- Collaborative contributions are automatically ingested into the broader knowledge base and retrieval system
- Other: ____

Comments: Describe how collaborative contributions are captured, and whether they feed into the platform's retrieval and recommendation systems.

2.5 Integration with other systems

Q11. Apart from SharePoint and Google Drive, which other systems integrations do you support?

Systems to support learning/ collaboration	Yes	No
Google Calendar		
Microsoft Outlook		
Google Meets		
Microsoft Teams		
Zoom		
Others (please specify)		

Comments: Describe the integration mechanisms and connectors/APIs available.

2.6 Dynamic Learning Assembly and Metadata Indexing

Q12. Can your platform dynamically assemble learning pathways that combine internal artefacts (resources, courses) with other internal artefacts and/or external courses or modules from third-party providers?

- Yes (can combine internal learning artefacts with any other external content library with an API)
- Partial (only combine internal learning artefacts with a limited selection of third-party provides)
- Partial (only combine internal learning artefacts)
- No
- On roadmap

Comments: Describe whether your system ingests and indexes metadata from third-party content providers to enable semantic search and AI-driven synthesis.

Section 3: User Experience and Change Management

Evaluated under Category 3 · Weight: 40% — see Annex A, Evaluation Weightage for Stage I

3.1 Evaluation of Learning Impact

Q13. Which learning impact indicators does your analytics cover? (Select all that apply)

- Engagement with knowledge artefacts
- Collaboration patterns
- Learning progression
- Skill development tracking
- Consolidated analytics across both internal and external content sources
- Other: ____

Comments: Describe your analytics capabilities and whether they can assess professional learning outcomes.

3.2 Implementation Approach

Q14. What is your recommended implementation approach for deploying the platform?

- Phased rollout with pilot — includes knowledge ingestion strategy and change management support
- Full deployment from the start with onboarding support
- Flexible — approach is tailored to client requirements

Comments: Describe your recommended pilot phases, knowledge ingestion strategies, and change management approach for educator adoption.

3.3 User Experience and Interface

Q15. Describe your platform's approach to user experience design, including:

- (a) Mobile responsiveness or native mobile support
- (b) Accessibility standards supported (e.g. WCAG 2.1)
- (c) Onboarding experience for new users

Comments: *Provide screenshots or a link to a demo environment if available.*

3.4 User Readiness and Change Management

Q16. What support does your organisation provide to drive user adoption and readiness?
(Select all that apply)

- Dedicated onboarding and training programmes for administrators and end users
- Change management advisory or consulting support
- Data migration support
- Self-service training materials (e.g. guides, videos, knowledge base)
- Ongoing customer success or account management support
- Other: _____

Comments: *Describe your track record in supporting large-scale educator adoption, including any relevant case studies or metrics.*

3.5 Solution Readiness

Q17. Is your solution currently deployed in a production environment, preferably with organisations of comparable scale (45,000+ users)?

- Yes
- No

Comments: *Provide reference examples if available.*

Section 4: Security and Compliance

Note: A more detailed security assessment will be conducted at Stage II.

4.1 Data Governance and Security

Q18. Does the platform ensure that AI-generated responses do not surface content or data beyond the access rights of the authenticated user on whose behalf the AI is acting?

- Yes
- No

4.2 Data Residency and Compliance

Q19. Where is your data hosted?

- 1) State the country of Data Hosting (Primary Location)
- 2) State the Country of Data Hosting (Backup Location)
- 3) State the Country of Data Hosting (Data In-Transit)

Comments: State the location of data residency and describe compliance with relevant data protection regulations. Specify if different parts of the AI pipeline involve separate data residency arrangements.

4.3 Security Certifications

Q21. Please provide all certifications on information security management systems (ISMS) and security level of cloud service providers that the company has obtained (e.g. ISO 27001, CSA-STAR, etc.).

Comments: List all current certifications with validity dates.

4.4 Single Sign-On (SSO)

Q22. Does your platform support Single Sign-On (SSO) integration with enterprise identity management systems?

- Yes
- No

Comments: Describe the SSO standards supported (e.g. SAML 2.0, OIDC).

Section 5: Others

Q23. Please provide 3 trial accounts/ login details and URLs to your platform. Trial access should be available till minimally 31 May 2026.

Dear Sir / Madam,

QUALIFICATION NOTICE OF SELECTIVE TENDER FOR A CONTRACT FOR PROVISION OF A TEACHER PROFESSIONAL LEARNING PLATFORM

1. We refer to your invitation to participate for the above captioned project.
2. The undersigned hereby expresses the team's interest to participate in the pre-tender qualification exercise for the above-mentioned project.
3. We understand that MOE shall shortlist suppliers for the subsequent tender based on our responses to Supplier Questionnaire, compliances with mandatory requirements and requirements specified with the words 'shall', 'must', and/or 'mandatory'.
4. We are aware that the same set of information declared by the team at 1st stage will be used for evaluation at the tender stage where applicable. We will inform MOE immediately of any changes to the team's information provided.
5. We enclose details in **Annex A** for your evaluation.

Yours faithfully,

Name and signature of Chief Executive of the Company: _____

Company's Name :

Company's Address :

Company's Contact No :

Company's Email Address :
